THE STORY SO FAR...

You are on a United Planets Freedom Forces mission to save the peaceful planet Katakis from the evil "Machine", ruler of all darkness in the galaxy. As Bren McGuire, you are the leader of the Freedom Forces in this crucial mission to destroy the grasp of evil for eternity.

The Freedom Forces fighters use the newest weapon technology available: The Turrigan assault suits.

Equipped with multiple weapon capabilities and the mighty Freeze-Beam to freeze temporarily almost any enemy, the Turrigan assault suit gives one man the abilities of a whole army. You have to find your way in 12 increasingly bigger levels, first on the surface of Katakis and later in the deep dungeons of the dark Alien-Queen. Don't hesitate to use all powers given to you... The challenge awaits!

STARTING THE GAME

Insert your "Super Turrigan" cartridge into your "Super Nintendo Entertainment System™" and turn the system on. You will see an intro sequence which can be skipped by pressing "Start". Press "Start" in the main selection screen to start the game.

NOTE: If you should own an amplifier capable of producing "Dolby Surround"™ sound, please use it with "Super Turrigan". The game makes heavy use of surround sound!

CONTROLS

You control Turrigan with the Super Nintendo Joypad Controller.

Press **B** to jump

Press **Y** to shoot

Press **L** or **X** to activate the Freeze-Beam

Press **R** or **A** to activate the Smart-Line

Press **START** to pause and unpaue the game at any time

GAME OPTIONS

If the default settings of "Super Turrigan" shouldn't fit your gaming habits, you can change them in the options menu.

Select "OPTIONS" in the main menu by highlighting the word and press "START".

Game Level

Normally you have 3 lives and 3 continues to waste. If you select "Easy", you have 5 lives in the beginning. If you select "Hard", there is no continue option.

Rapid Fire

Normally you just have to press the fire button and Turrigan will shoot automatically very fast. If your thumbs are made of steel, try the "Rapid Fire" off mode!

Controls

You can select 4 different button settings

Sound Mode

Please change this setting to "Mono" if you haven't connected your Super Nintendo to either a Stereo TV or any other Stereo-System. On most other games you won't lose sounds on mono systems if you do not switch to mono, but due to the usage of special "Surround" techniques, in "Super Turrigan" you will lose a considerable amount of sound if you don't change this setting. Press "Start" at any time in the options menu and you will exit to the main selection screen.

THE WEAPONS

Turrigan can select between three major types of weapons by collecting flashing icons with three different colours. Each weapon can be upgraded five times. If you lose a life, your weapons will be downgraded one level. If you change the weapon the level won't be upgraded:

Red: A powerful spread shot. Very effective in the open field.

Blue: The mighty laser. This one is good for tough enemies.

Yellow: The Bounce shot. Obviously very useful in caves as it bounces off the wall several times.

The Freeze Beam: Additionally to those three weapons, Turrigan has the "Freeze Beam".

Activate it by pressing the L Button and keep it pressed. By turning Turrigan to the left and right, you can circle the "Freeze Beam" over the whole screen. Every enemy hit by it is frozen for a few seconds and can be shot quite easily. The "Freeze Beam" doesn't work on big enemies, though.

The Smart Line: If you are in a hopeless situation, surrounded by enemies, use the "Smart Line" by pressing the R button. It will destroy almost anything in its way, but it breaks off if it hits the ground.

The Energy Wheel: If you duck and press the B button, Turrigan will turn into an almost unwoundable wheel of energy. In this form you can only lay mines and throw bombs in the air, but in certain situations, the wheel is very useful! If you want to transform back, just press the jump button. You have only limited "wheel time" which is marked by the line beneath your energy indicator. If your "Wheel time" runs out, Turrigan returns to his normal form.

Turrigan gets new "Wheel time" every level.

The Extra Block: Shoot hidden blocks to find loads of extra weapons, additional lines and power ups. In some hidden spaces you can also find extra lives.

Losing a life: You will lose one of your lives, when all of your energy is drained. Try to collect "Power ups" to refill your energy.

Level complete: To complete a level, just search and follow the "Exit" signs until you find the final "Exit" at the end of the level. In a few levels, huge monsters are waiting to be destroyed.

World complete: If you find the exit in the level and fight the huge end guardians, you have completed a world. At the end of a world you will see a statistic which tells you how many diamonds and lives you collected in that world and how many were left.

Game Over: If you should lose all lives left, you will see the "Continue Screen", if you still have left one of your three continues. Select "Yes" to continue the game from the beginning of the level you have died in. Select "No" to end the game.

TIPS & TRICKS

How to become a true Freedom Forces Fighter...

- Search the levels carefully. Diamonds are good for points and points will bring you extra lives!
- Try to find hidden blocks and try to jump on them. Sometimes you'll find even more this way.
- Extra lives are hidden everywhere!
- Don't forget to use the "Energy Wheel". Certain places can only be reached with the wheel.
- Use the "Freeze Beam" really often, it weakens the enemies!
